

Visual Cloud™ Environmental & Security Alerting with Access to Live Camera Feeds

Enable a "Visual Security System" to manage all surveillance cameras, access live feeds and integrate with physical security solutions and productivity tools.

Awareness is crucial to reducing response times and ultimately ensuring security and safety. ICON's Visual Cloud™ solution with access to live camera feeds provides video alerts on mobile phones and computers.

Related Services for Mapping

A Single, Integrated Solution Increases Security

- Send live video pop-ups and alert messages to Windows PC's eliminating the need to continuously monitor cameras.
- Integrate with sensors for both life safety and environmental monitoring.
- Receive notification of fire, moisture, water intrusion and unauthorized access on smart phones, tablets & PC's.
- Visually navigate live camera streams using building floor plans.
- Integrate with campus-specific applications and other third-party software.
- Train staff on primary functionality in less than ten minutes.
